

# SM-1000A

## SMD semi-automatic component Taping Machine

- ★ Track width can work freely in the range of 8mm to 72mm, the screen is easy and convenient for operate and control.
- ★ Fine adjustment head installed in hot-press device, adjustment of sealing position can accurate to 0.1±mm, independent PID temperature control accurately and steadily.
- ★ The position of cover tape can make fine adjustment by adjust the tension of the moving cover tape.Count by fiber-optical sensitive and equipped with leakage detection make braiding accurate.
- ★ Moving tape speed can be adjusted continuously and control by pedal, Compatible with all ELA-481 standard plastic reels.

Specifications:	
Size:	1650mm(L)*460mm(w)*580mm(H)
Feeding:	suitable with ELA-481 standard wheel and cover tape
Braid width:	Tape Width 12mm-88mm
Power supply:	AC200V,50Hz
Pressure:	3.0kg/cm <sup>2</sup>
Temperature control:	two heads and independent PID temperature control, temperature range is 20-200℃
Braid speed:	3000-7000pes/hr, According to specific Component
Calculator:	count by fiber-optical sensitive
Package type:	self adhesive or hot press
Weight:	50KG
